Settings(199)

How do I change the cavs logo to my own?

Any picture can be used as the background logo as long as it meets the following requirements.

1. The picture must be in BMP format.

2. The picture must be must named   cavs_logo

3. The picture must be smaller than 600 X 500 Pixels

Once your picture meets the above requirements copy the picture into C:/NJB99/Config and overwrite the current logo file.
