

# Functionality(199)

## How do I use multiple playlists in JB-199 including to create, use, edit, and save different playlists?

This feature is available for JB-199 Premier units or JB-199 Regular units that are upgraded to Dual Screen mode. Be sure that you are using JB-199 Program version 2.1.2.x or higher. The current version for JB-199 II Premier is 2.1.108.x. This feature is not available for JB-199 I Premier or JB-199 Regular units.

In the KJ Control Panel screen, on the top right corner, you will see the Playlist screen with buttons R, 1, 2, 3, 4, 5, 6. Each button 1 - 6 represents a different playlist from the main playlist R. Choose any of the six numbers to open a new playlist.

- To add any songs to a Playlist, click a song from the song List that is on the lower right corner of the KJ Control Panel.
- To save a Playlist, click on the Save icon which is located on the upper right corner of the Playlist screen.
- To open a Playlist from a saved file, click on Open icon which is located on the upper right corner of the Playlist screen.

All other operations in a Playlist is same as those in the main Playlist, which are described in the Manual. Other than the main Playlist (R), you can use 6 different Playlists (1, 2, 3, 4, 5, 6) simultaneously.
