

Settings(DVD)

How can I use my VGA connection on my [model] to connect my PC monitor?

Be aware that you will lose your television signal by switching to VGA output. Because of this, please make sure you have your VGA monitor connected and ready.

- Connect your karaoke player to a television
- Turn on the player
- Press setup on the remote
- Go to Preference and press Enter
- Go to Video Output and press the Right Arrow key
- Select VGA and hit Enter
 - *Your screen will go blank*
- Connect your VGA monitor
