

Tools/Software(199)

How do I load songs into the JB-199?

Download the attached instructions (JBManager - Loading Songs.pdf) and open them using a .pdf reader such as the free Adobe Acrobat Reader. This file will explain how to encode songs from a Karaoke Disc, as well as how to load songs into the JB-199 directory, using the JBManager program that can be found on the JB-199.

For more help on using JBManager, click the help button found on the top of each program within the JBManager Suite.

NOTE: If you are not using discs and have instead downloaded your tracks from online or already have them in a compatible file format, you may skip to the second section of the instructions beginning with the words, "Now, close CDG Encoder and start JBManager."
