Can I convert my mcg files back to cdg?

Please note that most of CAVS Karaoke players support both MCG and CDG formats. The latest CAVS Karaoke Laptops and PlayCDG KJ Deluxe 64 LT player support CDG, MCG, NCG, ZIP, AVI, WMV, Super CD+G, etc.

To convert MP3 + CDG files to MP3 + MCG files, you can use the Encoder MCG or MCG Manager program.

To convert MP3 + MCG files to MP3 + CDG files, you can use the Decoder CDG program to convert the MP3 + CDG files to BIN files first. Then from BIN files, you can use any generic extraction program such as MP3GToolz, Audiograbber, or Power CDG burner, etc. to convert the BIN files to CDG files. These generic programs can be found in the Internet under Yahoo or Google.
