

# PlayCDG KJ Deluxe 64 LT

## Why do many pop-up windows show up when trying to upload the new songs into the player?

When loading new songs into the Master Playlist in the PlayCDG KJ Deluxe 64 LT player, you are asked to mark the new songs in the bottom right section and press the Playlist button at the bottom of the screen. However when the Playlist button is pressed, you suddenly get many pop-up windows, so many that it sometimes crashes the program.

Here is the solution for the problem.

- Shut down the karaoke player.
- Restart the player and let it boot up completely.
- Minimize the 3D Customer Interface and go to the Control Panel.
- Click on Tools > Setting.
- Uncheck the item "Show Popup window for Queue".
- Click on OK to exit the Setting.
- Shut down the karaoke player.

Restart the player and proceed with the instruction given with the update songs to complete the upload.
