

PlayCDG KJ Deluxe

Why can't I get my Playlist and Songlist to Display on KJDX?

Our program saves its last location in the registry so that next time it is opened it is already configured to the users preferences. Once in a while the save will corrupt and when it is opened the songlist/playlist is scattered far beyond your screen.

Solution:

We have created a registry file that will entirely reset the player without having to reinstall it, or re-registering. Find the instructions to do so here: [How do I reset my PlayCDG KJ Deluxe?](#)
