

PlayCDG KJ Deluxe

How to play the songs one at a time

1. To play the reserved songs one at a time, so the songs do not play one after another automatically, press the PR button on the PlayCDG KJ Deluxe player. Place a check mark on the Disable Auto Play.
2. Place the reserved songs in the Play List, not in the Song List. Be sure to empty out the Song List.
3. Press the Play button to begin playing the first song in the Play List. After the song is played, the PlayCDG KJ Deluxe player will stop and wait for your command to start the next song.
