

PlayCDG KJ Deluxe

What does 3-PC license mean?

In order for you to install a software onto any PC, you require a license. Single PC license means that you only have our permission for installing it onto one computer. 3-PC license means that you have permission to install it onto three computers.

If our system detects that a program is being installed on more than the allowed computers the system will lock the account and a new purchase will be required to install the software again.
